SUBJECT: Surveying and Field Work as Part of Upcoming Water Main Project

Dear Customer:

Charlotte Water (CLTWater) is working with a Design Build team to plan and design a new water main to better serve our customers in Davidson. The project is titled "Davidson Water Transmission Main Phase III – Extension to NC 115." The goal of this project is to provide a new large diameter water main in the area that will improve system pressures and hydraulics, as well as enhance fire protection. Construction of phases I and II of this project were completed in 2018, leading into the design work of this Phase III project. The proposed route will generally run on the west side of N.C. Highway 115, beginning from the intersection of Main and Walnut streets and ending near the Davidson Town Limits, along NC 115.

This letter is to notify you that authorized representatives working on behalf of Charlotte Water will be working on or near your property on one or more occasions during the project's design phase. This design phase is expected to conclude in June 2020, with construction expected to begin shortly after. During this period, it may be necessary for Charlotte Water and authorized representatives' personnel to enter upon your property to conduct surveys, examination, appraisals and other investigations as may be necessary for work on this project. Their activities should not inconvenience you in any way.

All field crew are instructed to wear identifying clothing (i.e. companies' logo or a safety vest) to identify themselves. In addition to personnel, residents could see minor clearing activities in the area, survey stakes/flags, paint markings on the ground, and small machinery used for geotechnical borings. A list of companies that are involved with this project is included below:

- Propst Construction
- AECOM
- Yellow Duck Marketing
- Capstone
- CES Group Engineers
- Sweetwater Utilities
- Bartlett Tree Service

Additional information, including further technical details, can be found on Charlotte Water's website at: **[charlottewater.org](http://charlottewater.org)**. *Click on Projects, then Construction.*

If you have any questions about this project, please contact me at 980-219-9488 or **[stephen.scott@charlottenc.gov](mailto:stephen.scott@charlottenc.gov)**. Thank you for your cooperation and patience as we move forward with this important project. Additional notifications will be provided as this project progresses.

Regards,  
Stephen Scott, PE
